Secure Workspace in a Day (Rapid Deployment)

Deploy remote work scenarios—rapidly and securely.

Secure Workspace in a Day

Solution Highlights

Evaluate your remote work options and business implications in one workshop

Goal is to enable remote work quickly, with more advanced options at a later stage

ONE day workshop leaves you with a concrete deployment plan, timelines, and next actions

Remote work is enabling millions of workers around the world to stay productive, helping organizations to maintain business continuity in the face of our global health crisis.

Enable your team to work from anywhere with Secure Workspace in a Day

With this one-day workshop, we will show you how you can use Microsoft technologies to:

Empower people to stay connected

- Enable people to meet and collaborate from home
- Engage people with virtual events and communications
- Make productivity applications available on any device

Maintain security and control

- Enable cloud identities with single sign-on and selfservice password reset
- Secure, remote access to Microsoft Teams

Steps for Enablement

We will discuss the most critical steps for remote work, and how we can rapidly deploy key scenarios. We will evaluate your options and leave you with a concrete deployment plan and next steps.

This one-day workshop is primarily focused on business continuity, addressing the following quick steps of enablement:

Enable cloud or hybrid identity

Single sign-on and self- service password reset

Rapid deployment of Teams

Checklists, activation, installation, configuration

Provide Adoption Kit

End user training, workload introductions & support resources

Secure access to Teams

Conditional Access and Multi-Factor Authentication (MFA)

Secure Workspace in a Day

What's Included?

In addition to the **Deployment Guidance report**, you will get:

- · Environmental & workload analysis, including a quick assessment of your security posture
- A list of actionable recommendations to deploy hybrid identity, Microsoft Teams, and security
- Teams & Security Adoption Kit, including end user training, workload introductions, and support resources
- An inside look at Microsoft's holistic approach to remote work and how it relates to your organization
- Identification of potential blockers and challenges
- Recommendation on free Microsoft 365 trials for immediate deployment
- Technical guide for advanced remote work scenarios

Follow Up Discussions

The one-day workshop is focusing on quick and secure workspace enablement, which is also a foundational element for future conversations on our Microsoft 365 solutions:

- Secure Workspace Essentials
 Includes M365, Exchange Online, OneDrive, Teams, SharePoint and WatServ CloudOps
- Secure Workspace Standard
 Includes Secure Workspace Essentials plus Endpoint Management, Windows updates, security improvements and WatServ CloudOps
- Secure Workspace Premium
 Includes Secure Workspace Standard plus Azure Virtual Desktop and WatServ CloudOps

Who It's For

The workshop is intended for decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security

- IT Compliance
- Data Governance
- IT Operations
